

KP Building Products invests \$3.2 Million in Its Farley Window and Patio Door Division

April 19, 2017 - KP Building Products is proud to announce a \$3.2 million investment in its Farley Brand of Window and Patio door manufacturing facility. The investment includes a state-of-the-art painting facility as well as additional manufacturing equipment to its window operation in order to meet the increased demand for Farley branded PVC windows and doors. These investments solidify KP Building Products' commitment to growth and will allow us to better service and grow with our customer base and positions the Farley brand as one of the preferred window and patio door suppliers in the North American window industry.

The company was purchased by KP Building Products in 2014 and has witnessed exceptional growth over the last 3 years as a result of structured investment and innovation programs. Farley Windows and Doors are an integral part of the KP Building Products Group which offers a full array of products for both the exterior and interior of the home. A skilled workforce of 200 people is employed at its North American facility.

Lionel Dubrofsky, President of KP Building Products stated, "With today's announcement, this important investment project confirms Farley Window and Door's leadership position in the PVC window and patio door industry and allows us to further enhance our leading edge window and door offering for our customers. KP Building Products has invested heavily into the Farley brand and in its product development, launching world class innovations such as its renowned VERTEX 3 window technology which was a first when it was launched and is still unmatched in the window and patio door industry today".
