vertex3®

HIGH-PERFORMANCE WINDOW TECHNOLOGY

3 technologies in 1 high performing window

Vertex3 High-Performance Window Technology Is Engineered To Provide **Superior Thermal Efficiency**, **Superior Glass Clarity** And **Superior Air Infiltration Protection**.

1 ēvolv

ēvolv Glass Technology is a coating placed on the 4th glass surface (interior of the house) that redirects escaping heat back into the home. Not only does **ēvolv greatly increase a window's U-Value, but it offers better light transmittance and less reflectance.** A double pane window with the performance of a triple pane thanks to **ēvolv**.

You can actually feel the difference by staying close to **ēvolv** windows as they will redirect heat as opposed to a wall that will absorb it. **ēvolv** is resistant to surface cleaning products and will not fade with time.

2 ec TECH

ECTech naturally clean glass is a surface 1 coating (exterior of the house) which absorbs the sun's UV light to loosen dirt so water can rinse it away. The patented **ECTech coating rids itself of many non-mineral deposits** (i.e. adhesive residue, fingerprints, pollens, resins, bird droppings, suction cup marks, etc.).

3

Farley Windows has partnered with **Owens Corning®**, a world leader in insulation products, to offer the exclusive **Owens Corning®** Air sealing technology. This technology is designed to improve your insulating value and make it as resistant as possible, and offering a **24% improvement on air infiltration**.

Farley Windows relies on this strong association built with **Owens Corning®**, the most trusted name in home insulation in North America, and an indispensable part of the Vertex3® system.

Introduction

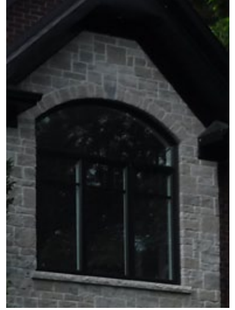
Welcome to our Farley Windows look book, our digital issue will focus on our window collection and how they can transform the look of your home. This inspirational guide will highlight our two most popular shades white and the ever so trendy black. Visit our website for further design ideas featuring colors, finishes and designs.

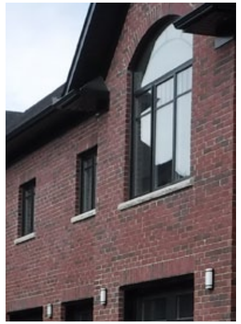
HUNG WINDOW

ARCHITECTURAL WINDOW

White windows are timeless, they can be understated or demand attention. In this project they add a burst of freshness to this neutral palette. A beautifully elegant color scheme that will never go out of style.

1. Windows: **Fixed Architecture & Hung - White** 2. Vinyl Siding: **Wicker**
3. Shutters: **Black** 4. Roofing: **Brown**





Stately Sophistication

Another example of black windows adding a touch of contemporary style to a traditional exterior. The choice of black perfectly complements the design without being overpowering. A stunning combination.

1. Windows: **Fixed Architecture & Casement - Black** 2. Stone: **Gray**
3. Bricks: **Dark Red** 4. Roofing: **Black**
